TO WHOM IT MAY CONCERN

RE: ADETONA OLUWATIMILEYIN DEBORAH

The above named person has worked in the Malaria Research Laboratory of the Department of Paediatrics, College of Medicine, University of Ibadan/University College Hospital, as a student on Industrial Training for a period of 1 year from 6th May, 2019 – 28th February, 2020.

During the period, she exhibited a very high sense of responsibility. She responded to the duties earmarked for her in the Laboratory with great enthusiasm. She had quite a good exposure to basic simple everyday techniques. She is very active and always ready to learn. Her willingness to learn facilitated exposing her both to the basic concepts of haematology and parasitology.

By the end of her training, she is capable of working under very little supervision. She is very respectful and well behaved. She will surely make a mark in any chosen future endeavours through her dint of hardwork.

I therefore recommends her very highly to anyone wherever she may need to participate in scientific research or service.

Thank you

Yours faithfully

A.K. Afolabi

Technologist/Industrial Based Supervisor
